

## Manual Lubricating Pump for Oil Model LMO

### Description

Used in machines and equipment that depend on manual, periodical lubrication such as presses, plastic injection machines, printing machines, textile machines, machine tool, etc. Easy operation due to its compact size. Low acquisition and maintenance costs.

As this pump has a minimum movable parts, it safely lubricates all points of the system each time lever is actuated. Lever returns to its original position via spring action.

Note: In order to meet other applications, Lubricating Pump Model LMO may be supplied in its special version for automation by means of pneumatic cylinders, cams and backstops installed on movable parts of the machine, etc.

### Specifications

No. of outlets	1 to 12
Flow per outlet	0.5 cm <sup>3</sup> per action
Flow, total maximum	5 cm <sup>3</sup> per action
Pressure	150 kg/cm <sup>2</sup> maximum
Reservoir	800 cm <sup>3</sup> (transparent for visible oil level)
Lubricant	Oil 1000 cSt maximum
Driving	
1 - Manual - ST	
2 - Mechanical - CR	
3 - Special driving under request	

### Important:

By previous request, Lubricating Pump LGO may be supplied with different flows at different outlets for metering lubricant at bearings with different requirements. Being that the case, flows shall be kept within respective limits.
