

## Manual Pump for Oil Model PM-6

### Description

Manual pumps PM-6 are indicated for centralized lubrication systems with oil where resistance-metering units are used. You operate the pump by gently pulling the handle to the vertical position. A slow and automatic return driven by means of a spring determines the delivery to the system. Fast return of the handle means empty reservoir. In order to guarantee a perfect operation, it is recommended to clean the strainer at the outlet at regular intervals.

### Specifications

Discharge/stroke	6 cm <sup>3</sup> maximum
Working pressure	3 kg/cm <sup>2</sup> maximum
Suction strainer	250 micron
Discharge port	5/16" UNF (groove)
Working temperature	From -10 °C to +60 °C
Lubricant	Oil 50-220 cSt 40 °C
Plastic reservoir	0.5 liters
Mounting	Vertical
Reference	00.115.1
Ordering code	9237

### Overall Dimensions
